

DR. CHI'S SEMINAR

Achieving Optimal Health through Physical Markers and Herbs
March 10-11, 2018 | Anaheim, California

DESCRIPTION

Combining a method of diagnosis and solutions, this seminar will enhance practitioners' knowledge and diagnostic skills in order to provide comprehensive patient care. Practitioners will be introduced to a noninvasive diagnostic technique that can be used singly or in conjunction with other conventional diagnostic tools or methods. Based on a combination of Eastern and Western methodologies, this technique involves the early manifestations of health issues through physical markers on the fingernails, tongue and other parts of the body. These markers are used to detect chronic ailments early and determine specific clinical markers that can be tested to confirm diagnosis and monitor patient progress. Furthering the practitioners' knowledge, this seminar will also explore natural and integrative solutions for their patients through different herbs and botanicals that can be incorporated as dietary supplements to help promote health and minimize physiological dysfunctions and complications.

SEMINAR OBJECTIVES

At the conclusion of this seminar, attendees should be able to:

- (1) Identify various physical markers and relate them to corresponding health conditions.
- (2) Formulate patient care strategies combining herbal supplements and nutrition for the management of health conditions.

LOCATION & SCHEDULE

1435 N. Brasher Street
Anaheim, CA 92807
